Objective

Looking for a challenging role in a reputable organization to utilize my technical, database, and management skills for the growth of the organization as well as to enhance my knowledge about new trends in the IT sector.

Education

Year	Degree/Examination	Institution/Board	CGPA/Percentage
2021	Bachelor of Engineering (CS)	Krishna Engineering College, Chhattisgarh	8.5
2017	Intermediate (Class XII)	Govt Higher Secondary School, Khursipar	86.86%
2015	Matriculation (Class X)	Govt Higher Secondary School, Khursipar	83.8%

Experience

Prixso Software Private Limited | Software Engineer   November 2021 - February 2023

App based Tiffin service.

- Tifinco is a Customized Subscription based app where users can subscribe to a flexible subscription plan catering to every user's needs with a few smarter choices for cuisine types of meals.
- Was part of the tech team and worked on critical projects, making API in the backend for the App and website as well. The tech Stack that was used for this were React JS, NodeJS, Express JS and Mongo DB.
- Implementing user registration, login and authorization features in MERN application by using authentication mechanisms like JSON Web Tokens (JWT) and OAuth and was also responsible for making sure that the software application works as well so that company operations are as required.
- Developed RESTful API design principles and implemented routes in Express.js to handle CRUD operations.

Internship and Certifications

Newton School | Trainee   December 2022 - Present

- Pursuing a Certification Course on Full Stack Development.
